Large-Scale Cabinet Washer

B-TEC[®]
North America
... INNOVATIONS FOR PROFESSIONALS

robust - established - spacious

Large - Scale Cabinet Washer - Combination

Washer combination with automatic and manual washing features

K-1200

- **Two Gun Cleaners in one cabinet**
- Two closed loops
- For the first time, paint guns can easily be front loaded
- Short cleaning process with excellent results
- Efficient exhausting systems
- Automatic and manual cleaning in one unit
- Ergonomically designed construction of units allows consistent front operation
- Module concept saves space and enables easier handling
- Tightly closing air-flush system of paint guns during cleaning process
- For solvents or water
- All machine parts for cleaning purposes are made of stainless steel
- All performance adjustable
- Dimension: (W x L x H) 3.93 x 2.29 x 5.90 feet

Optional: Drip protection tray

Manual Large - Scale Cabinet Washer

M-1200-1 / M-1200-2

- Spacious washing area allows to clean items up to 3.94 feet length
- The quantity of solvent dispensed through the brush is easily adjustable during cleaning (pump-driven)
- Adjustable fresh dilution jet
- Efficient exhausting system for solvent emissions
- Ergonomic construction
- Economical use of cleaning agents and solvents
- All machine parts for cleaning purposes are made of stainless steel
- All performance adjustable
- **Optional:** for two operators working simultaneously (two brushes, two fresh solvent jets) (M-1200-2)
- **Optional:** Stainless steel flap with automatic air exhausting system
- Dimension: (W x L x H) 3.94 x 2.29 x 5.90 feet

www.b-tecna.com

Large - Scale Mixing and Preparation Table

Work space with exhaust System

T-1200-1 / T-1200-2

- Large workplace with powerful B-TEC air exhausting system for handling of lacquers, paints and solvents
- Place for preparation of paint- and spray guns
- Keeps your workplace organized and reduces the level of pollutants at the workplace environment
- Collection tray under the work counter
- Storage room for the daily use of laquers, paints and solvents (T-1200-1)
- Two storage shelves made of stainless steel (T-1200-2)
- Entire work space and washing basin are made of stainless steel
- **Optional:** Stainless steel flap with automatic air exhausting system (prevents dust from penetrating into open cans and containers)
- Dimension: (W x L x H) 3.94 x 2.29 x 5.90 feet

The B-TEC Modular Design

- All of our machines and stations can be grouped for an optimum functional combination - the specific and individual needs of the user are sure to be fulfilled.
- All B-TEC machines shown here have their own built-in collection trays under the work counters
- All machines can be built completely in stainless steel (optional)
- For toughest operating conditions
- All units and systems are designed for use with water and/or solvent

junior - plus - series

Manual Washing Device

m-800

- Adequate work space for manual cleaning
- Powerful B-TEC exhausting system
- Manual cleaning using feed-through brush (pump-driven) and fresh dilution jet
- All machine parts are made of stainless steel
- For solvents or water
- Connector for compressed air plus blow gun w / air hose
- All performance adjustable
- Gurney collecting tray for containers of 30, 58 and 60 litres
- Dimension: (W x L x H) 2.95 x 2.39 x 7.75 feet

junior - plus - series

Gun cleaner for water based paint

w-800-1 / w-800-2

- All machine parts for cleaning purposes are made of stainless steel
- Ergonomic design
- Deflector plate around the washing area
- Adjustable through-feed brush and rinse gun
- Pneumatic blending equipment (coagulation)
- Connector for compressed air plus blow gun w / air hose
- Including filters and water/paint separation kit
- Optional: front door for sub-construction
- w-800-2: without pump for structural water supply
- Dimension: (W x L x H) 2.95 x 2.39 x 4.06 feet

junior - plus - series

Innovative washer-combination for water-based cleaner and solvent.

Two universal units in one body

d-800

Each unit (water-base or solvent) comes with following equipment:

- Manual cleaning using feed-through brush, pump-driven (circulated cleaner)
- Manual clear rinse for fresh solvent or fresh water base cleaner
- Filling-Station for fresh solvent or fresh water-base cleaner
- Powerful B-TEC exhausting system
- Automatic spray-gun cleaning with timer
- Includes automatic clear rinse

- Excellent cleaning results
- All features are individually adjustable
- Connector for compressed air plus blow gun w / air hose
- Two gurney collecting trays for containers of 30, 58 and 60 litres
- Dimension: (W x L x H) 3.93 x 2.29 x 5.97 feet

Water-base cleaner

Solvent

junior - plus - series

Innovative washer-combination for water-based cleaner and solvent.

Two universal units in one body

d-800

junior - plus - series

Washer - combination for water and solvent

k-800

- Ideal washer-combination consisting of gun-cleaners u-800 and w-800
- Only 3.93 feet wide
- Optimum cleaning results
- Easy to handle
- Including: filters and water/paint separation kit
- All performance adjustable
- Including: front door for sub-construction
- Optional: automatic clear rinse
- Gurney tray for containers 30, 58 and 60 litres
- Dimension: (W x L x H) 3.93 x 2.29 x 5.97 feet
- Connector for compressed air plus blow gun w / air hose

Universal Gun Cleaner

Starter-01 / manual + automatic

Starter-02 / manual

Starter-03 / automatic (w/o brush)

- Durable construction for wall mounted
- For automatic and manual cleaning
- Powerful B-TEC exhaust system
- Manual cleaning using flow through brush and fresh rinse
- All machine parts are made of stainless steel
- For solvent or water
- Air tight closed air-flush system of paint guns during cleaning process
- Starter-02: manual gun-cleaner, built same as Starter-01 without automatic cleaning
- Starter-03: automatic gun-cleaner, built same as Starter-01 without brush
- Dimension: (W x L x H) 2.10 x 1.67 x 1.21 feet

www.b-tecna.com

Optional: Base Cabinet

First Automatic Cleaning System for "PPS-Systems"

Save up to 90% of your "PPS systems costs"

Starter-04

- Durable construction for wall mounted
- Incl. stainless steel reservoir
- Completely made of stainless steel
- Timer
- Manual clear rinse
- Air-exhaust-system
- Easy handling
- Positive results
- Optional: Base cabinet
- Dimension: (W x L x H) 2.10 x 1.67 x 1.21 feet

Preparation and Mixing Table

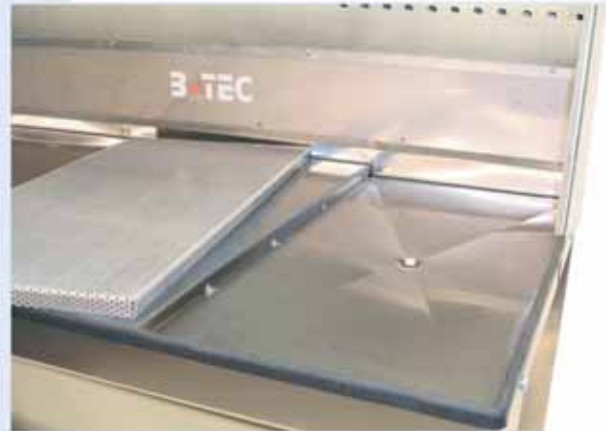

Stainless steel mixing and work-table with
air-exhaust system

Painty-02

- All parts are made of stainless steel
- Adjustable air exhausting system
- Drainage area with tray
- Current edge protection
- Multiple storage shelves

Scope of supply:

- 4 - spray gun holders
- 1 - holder for paper rolls
- 1 - holder for garbage bag
- 1 - incl. air-coupling socket
- 1 - incl. exhaust air tube, flexible
- Dimension: (W x L x H) 3,87 x 2,02 x 4,65 feet

Drainage area with tray

Preparation and Mixing Table

Mixing and Work-Table for Painters

Painty-01

- Provides organization at workplace
- Durable construction
- Working area made of stainless steel
- Drainage area with tray
- Large storage areas

Scope of supply:

- 4 - spray gun holders
- 1 - holder for paper rolls
- Strong magnetic bar
- Dimension: (W x L x H) 3.87 x 2.02 x 4.65 feet

Waterborne Speed-Dryer

SD- 1 - Speed Dryers (2) w / stand SD- 1 - S Speed Dryer - stand only

- First-time application on corners
- Continuous adjustment
- Including extension for upper cars
- Mobile-purpose
- Adapted for gratings
- Removable blow off guns
- Accustomed high B-TEC-quality
- Dimension: (W x B) max. 4.10 x 7.38 feet

Coagulation Kit CS-300

The professional coagulation station

With simple filtration, flocculation (the separation of paint/resin/water) will be quick and complete from the cleaning solution or water.

The remaining filtration fluid can be re-used.
The filter residue can be dried and disposed of properly.

- Complete Kit
- Easy to use
- Saves money by extending use of cleaning solution

Coagulation Compound CM-900

B-TEC CM-900 is a harmless, environmentally friendly powder-like product that is used for coagulation of water-based paints and varnishes from their cleaning solution. This process allows for continued reuse of the cleaning solution and for the preparation of pigment, resin, etc. for proper disposal. It can be used with any water-based automotive finish.

- For refreshing H₂O-cleaning solutions or water
- Use after complete contamination of the H₂O-cleaners
